

Use **RYDLYME Marine**, a commercial descaling solution to clean the seawater side of heat exchangers on all types of vessels, including work boats, cruise ships, freighters, and recreational boats. Scale build-up on heat exchanger tubes can inhibit effective cooling and damage equipment. Until now, heat exchangers were removed from the vessel and cleaned ashore, resulting in high costs and lengthy equipment down times. With RYDLYME Marine you can CIP (clean-in-place) to reduce work load and save valuable maintenance dollars.

Using **RYDLYME Marine** to remove unwanted marine growths will keep your vital water system operating efficiently with minimum attention and expense. When your ship inspection requires superior maintenance or repair, count on **RYDLYME Marine** for descaling hard water effects such as lime scale, scum, and fouling of your water systems.

Part # MACK 1093  
(1 Gallon)

Suggested List Price: \$23.34

Part # MACK 1168

(5 Gallon)

Suggested List Price: \$110.00

Part # MACK 1093-55D

(55 Gallon)

Suggested List Price: \$925.00
